

It is the job of the FCC to enforce the law requiring corporations using the public airways for free to act in the public interest and not lobby against contenders for President. These corporations may also not force their subsidiaries to forfeit their regular programming in order to blanket the airways with slander of specific candidates.

Sinclair Corporation is doing just what I mentioned above, by forcing its subsidiaries to broadcast a program of smears against Senator John Kerry shortly before the national election.

It is time for the FCC to act!

Thank you.
